Project Design Phase-II

Solution Requirements (Functional & Non-functional)

Date	03 October 2026
Team ID	SWTID-2026-5094
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	4 Marks

1. Functional Requirements

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	**Laptop Request Management**	Submit standard laptop request through ServiceNow form
		Enter employee and department details
		Select standard laptop requirement
FR-2	**Request Validation**	Validate mandatory request details
		Check standard laptop availability
		Update request validation status
FR-3	**Approval Management**	Send request to manager for approval
		Manager can approve or reject the request
		Store approval decision and comments
FR-4	**Procurement Automation**	Automatically trigger Flow Designer after valid approval
		Create procurement task automatically
		Assign task to procurement team
FR-5	**Notification Management**	Send request confirmation notification

		Notify employee about approval/rejection
		Send order and delivery status updates
FR-6	**Order Tracking**	Update laptop order status
		Allow employee to view request/order status
		Mark request as completed after delivery
FR-7	**Dashboard & Monitoring**	Display pending, approved, ordered and completed requests
		Allow IT Manager to monitor procurement progress
		Generate procurement status information

2. Non-functional Requirements

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	**Usability**	The request form and workflow should be simple and easy for employees, managers and IT staff to use.
NFR-2	**Security**	Only authorized users should be able to submit, approve, process or monitor laptop requests based on their roles.
NFR-3	**Reliability**	The system should process requests and workflow activities accurately without losing request or approval information.
NFR-4	**Performance**	Requests, approvals, notifications and procurement tasks should be processed within a reasonable time.
NFR-5	**Availability**	The procurement workflow should be available whenever authorized users need to submit or process requests.
NFR-6	**Scalability**	The system should support an increasing number of employees, laptop requests and procurement tasks without major changes.
