Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	2Marks

Problem – Solution Fit

The proposed solution addresses the difficulties faced by employees, managers, IT administrators, and procurement teams during standard laptop procurement. The **ServiceNow Flow Designer** automates request validation, approval, procurement task creation, notifications, and order tracking.

Problem / Customer Need	Existing Behaviour	Proposed Solution	Problem–Solution Fit
Employees need to request laptops easily	Employees may depend on manual requests or communication with IT	Provide a standard laptop request form in ServiceNow	Simplifies laptop request submission
Managers need to approve requests quickly	Approval may require manual communication and follow-up	Automate manager approval through Flow Designer	Reduces approval delays
IT administrators need to validate requests	Request details may be checked manually	Automate validation and laptop availability checks	Reduces repetitive manual work
Procurement team needs approved request information	Information may be transferred manually	Automatically create and assign procurement tasks	Improves procurement processing

Employees need status updates	Employees may repeatedly contact IT for updates	Send automatic notifications when request status changes	Improves transparency
Employees need to track laptop delivery	Order status may not be easily visible	Provide request/order status tracking	Gives better visibility of the procurement process
