STREAMLINING IT PROCUREMENT: AUTOMATING STANDARD LAPTOP ORDERS WITH FLOW DESIGNER

Scrum Terminology

A **Sprint** is a fixed period or duration in which a team works to complete a specific set of tasks.

An **Epic** is a large task or project that is too big to complete in one sprint. It is divided into smaller tasks called **Stories**, which can be completed over multiple sprints.

A **Story** is a small task or requirement that forms part of an Epic.

A **Story Point** is a number that represents the amount of effort required to complete a story. Story points are usually estimated using the **Fibonacci series: 1, 2, 3, 5, 8**.

- **1** – Very Easy Task
- **2** – Easy Task
- **3** – Moderate Task
- **5** – Difficult Task
- **8** – Very Difficult Task

Story Point Scale

Story Points – 1, 2, 3, 5, 8

SPRINT 1

Laptop Procurement Request (Epic 1)

- **Creating Laptop Request Form (USN1)** – 2
- **Capturing Employee Details (USN2)** – 1

Request Validation and Data Preparation (Epic 2)

- **Validating Request Details (USN3)** – 3
- **Checking Standard Laptop Availability (USN4)** – 3
- **Creating Procurement Request Fields (USN5)** – 3

Total Story Points in Sprint 1

2 + 1 + 3 + 3 + 3 = 12

SPRINT 2

Flow Designer Automation (Epic 3)

- **Creating Flow Trigger (USN6)** – 2
- **Adding Approval Action (USN7)** – 3
- **Configuring Procurement Task Creation (USN8)** – 3
- **Sending Automated Notifications (USN9)** – 2

Laptop Order Processing (Epic 4)

- **Creating Standard Laptop Order Workflow (USN10)** – 5
- **Testing and Validating the Flow (USN11)** – 5

Total Story Points in Sprint 2

2 + 3 + 3 + 2 + 5 + 5 = 20

TOTAL STORY POINTS

Sprint 1 = 12 Story Points

Sprint 2 = 20 Story Points

Velocity Calculation

Velocity = Total Story Points Completed / Number of Sprints

Total Story Points:

12 + 20 = 32

Number of Sprints:

2

Therefore,

Velocity = 32 / 2

Velocity = 16 Story Points per Sprint

The team's velocity is 16 Story Points per Sprint.
