Functional & Performance Testing Template

Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

Date	03 October 2026
Team ID	SWTID-2026-5094
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	-

Test Scenarios & Results

Test Case ID	Scenario (What to test)	Test Steps (How to test)	Expected Result	Actual Result	Pass/Fail
FT-01	Text Input Validation (e.g., Employee ID, Justification, Delivery Address)	Enter valid and invalid text/alphanumeric formats in order input fields	Valid employee and order details accepted; clear error messages for invalid entries	Valid inputs were processed without errors, and appropriate validation errors were displayed for invalid entries.	Pass

FT-02	Number Input Validation (e.g., Laptop Quantity, Cost Center Code, Phone Number)	Enter order quantities and numeric codes within and outside permitted limits	Accepts valid quantities (e.g., 1-5 units); displays error for out-of-range or negative values	Quantity range (1-5) worked as expected. Negative numbers and out-of-range values were blocked.	Pass
FT-03	Content & Workflow Generation (e.g., Flow Designer Laptop Order Trigger)	Submit a complete standard laptop procurement form and trigger Flow Designer automation	Flow Designer automatically creates catalog task, routes approval, and updates order status accurately	Catalog task was successfully generated, approval email was routed, and order status updated to 'Pending Approval'.	Pass
FT-04	API Connection Check (e.g., ServiceNow / Flow Designer Integration API)	Verify API authentication keys and connectivity with the procurement engine	API connects and responds with success status code (200 OK)	API endpoint responded with status code 200 OK and response time under 150ms.	Pass

PT-01	Response Time Test	Measure elapsed time from order submission to Flow Designer workflow initiation	Workflow initiation and automated email confirmation complete in under 3 seconds	Workflow execution completed and confirmation email sent in 1.8 seconds.	Pass
PT-02	API Speed Test (Concurrent Order Submissions)	Simulate multiple simultaneous laptop order requests via Flow Designer API	API processes concurrent requests seamlessly without speed degradation or dropped orders	Handled 50 concurrent procurement API requests without any failed transactions or latency spikes.	Pass
PT-03	File Upload Load Test (e.g., Procurement Invoices, Specifications)	Upload multiple PDF attachments (spec sheets, approvals) concurrently during order creation	Attachments process smoothly without system lag, file corruption, or timeouts	Multiple PDF files (5MB each) uploaded successfully and attached to the order record cleanly.	Pass
